PROJECTS

Kudos

<https://kudos-caca8.web.app/>

CSS, Express.js, HTML, JavaScript, MongoDB, Node.js, Socket.io, TypeScript, Vue

Kudos is a chat application where two users can, in real-time, communicate privately or group conversations between more than two users can be created.

- Make an account by simply creating a unique username. Further information can be added later;
- Sending a message or creating a group doesn't require participants to be "friends";
- Server is hosted on Render and client is hosted on Firebase.
